

Assignment 2:

1. You need to make a video on usage of AI techniques in your domain. For example, application of search/SAT/CSP based methods to optimize mechanical design (Mechanical Engineering) or supply chain management (ISE), etc.
 - (a) You need to create a video of 15-20 minutes duration. You can form a group with no more than 4 students. (This group need not be the same as in Assignment-1).
 - (b) Video must include - introduction to the problem, current state-of-the-art, modeling of the problem using AI techniques, implementation, results, discussion. Please provide good title of your video.
 - (c) In the video, every member of your group should speak and the presenter face should be visible while speaking.
 - (d) You need to upload the video on youtube and share us the link.
 - (e) Please try to avoid ML/DL based techniques.
 - (f) Deadline of submission - 11th April.
